

ABPS

Animated Building Performance Simulation

Christoph Reinhart | Kera Lagios | Jeff Niemasz
Harvard Graduate School of Design

Harvard University
Graduate School of Design

CONTEXT

SOFTWARE: NURBS based modeling

Radiance

CONTEXT

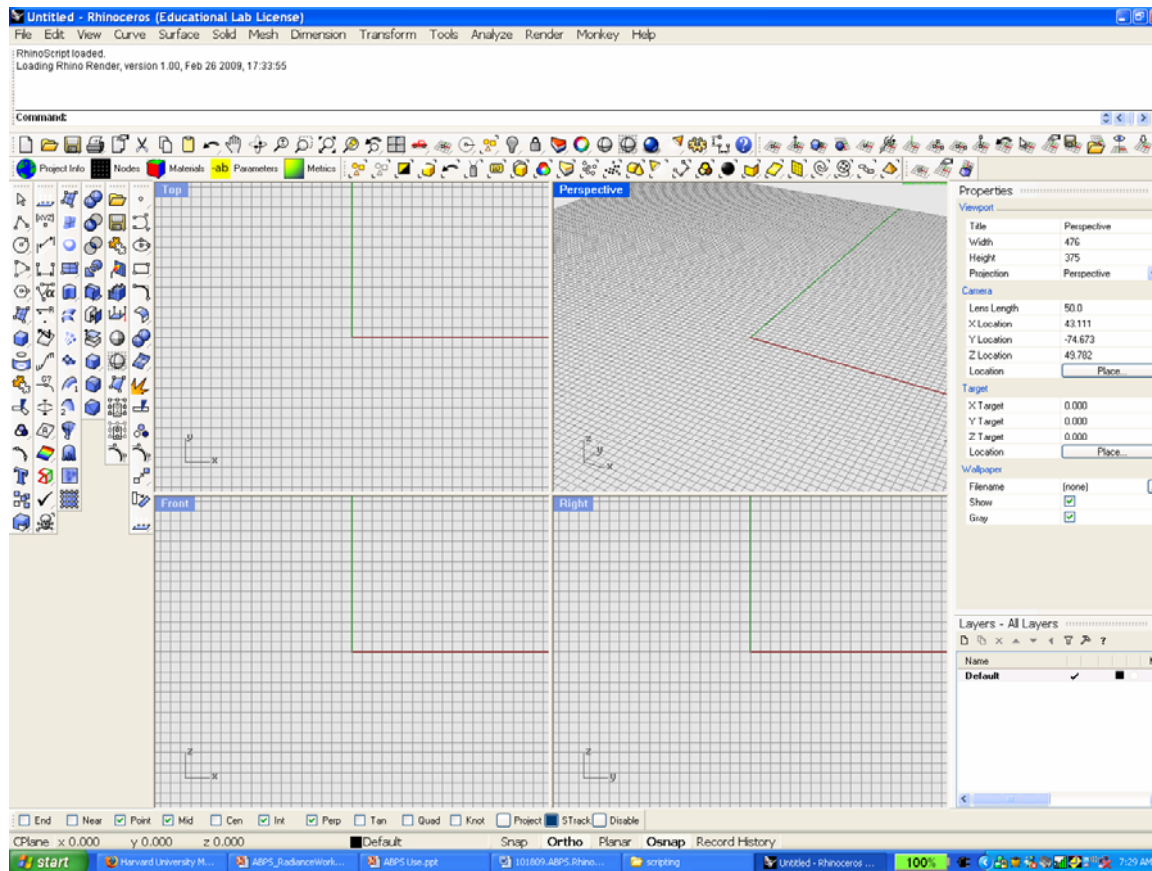

PARAMETRICS

CONTEXT

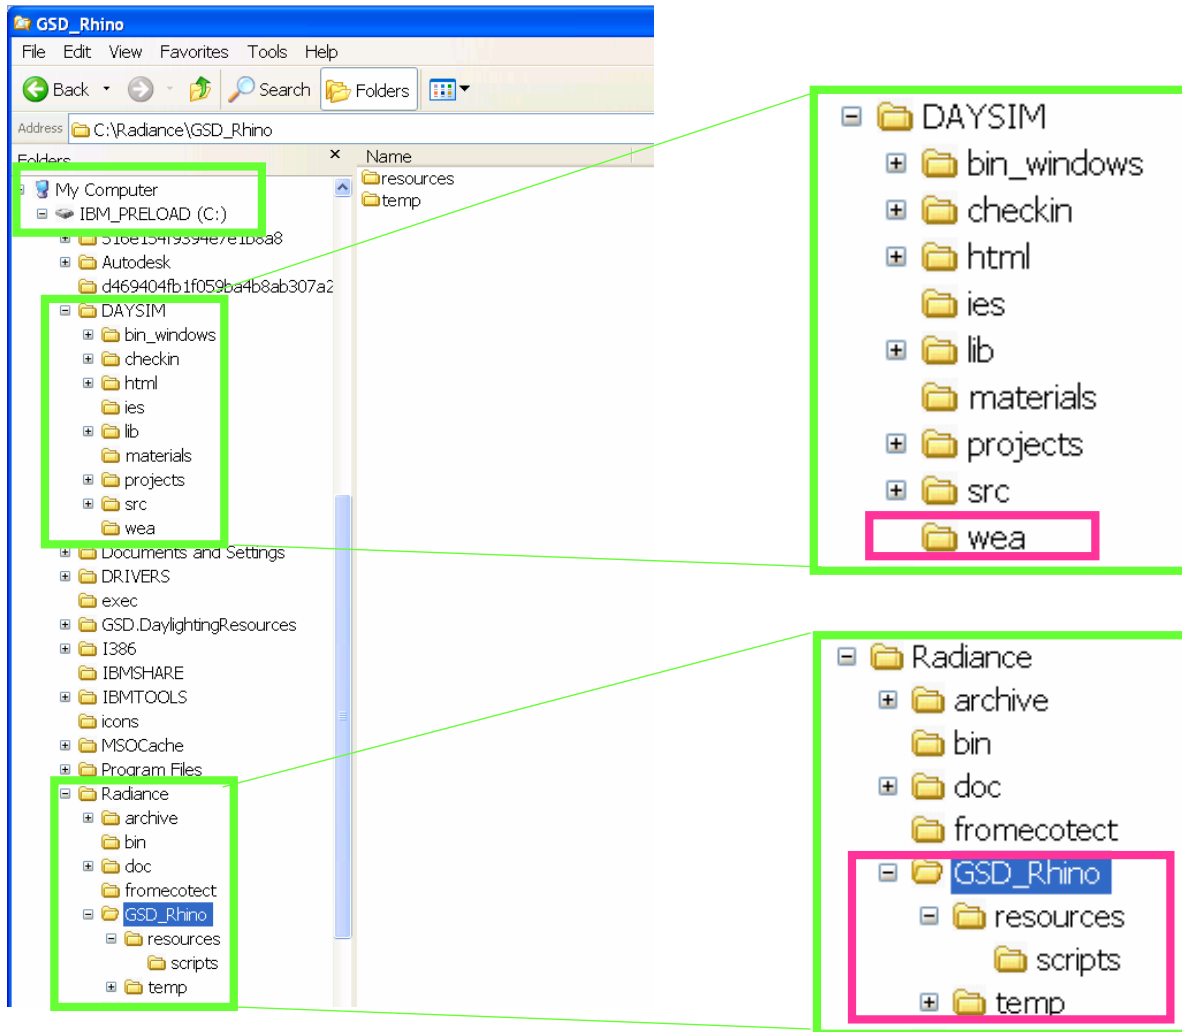

TOOLBAR: For Rhinoceros 4.0 and Grasshopper 6.0

PLATFORM: Rhinoscripting (a language based on VBScript)

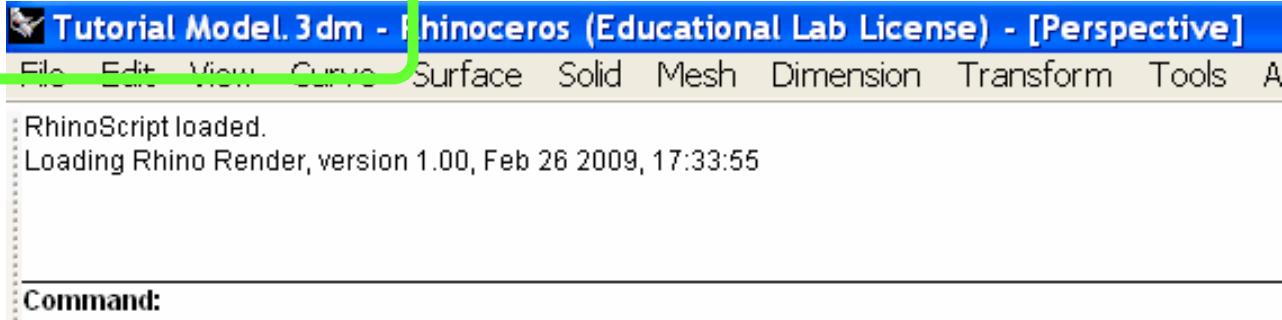

CONTEXT

NECESSARY FILES: Skies, .epw, .map, material.rad, .rvb

PROCESS

CHALLENGE 1: Naming Convention
INTENT: Maintain function given “spaces”

The “tag” is part of your filename, up to the first [space].
The rest of the name is truncated.

Example 1:	Tutorial Model.3dm >> Tutorial
Example 2:	trial 1.3dm >> trial 1.3dm >> trial
Example 3:	trial 2.3dm >> trial 2.3dm >> trial

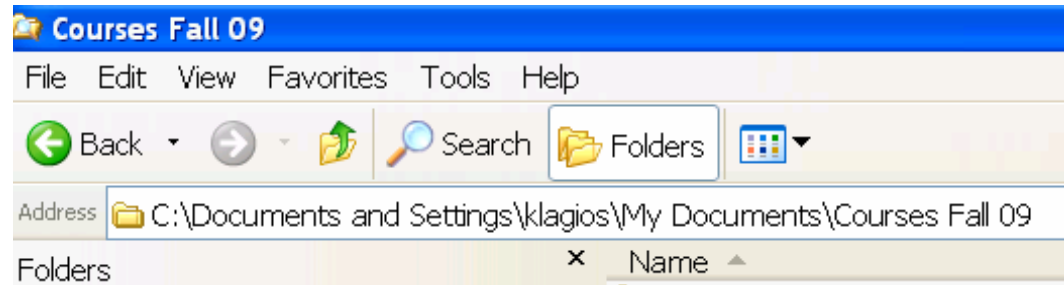

PROCESS

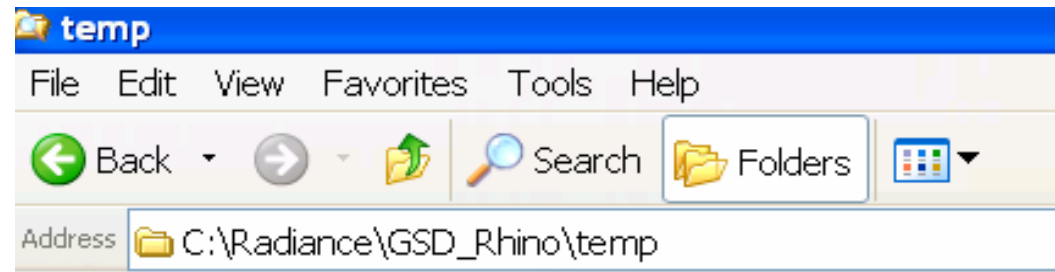

CHALLENGE 2: Directory Convention

INTENT: Maintain freedom of user storage

User Folder

Storage Folder Default

OK

C:\Radiance\GSD_Rhino\trial1

NOT OK

C:\Documents and Settings\user\My Documents\trial 1

NOTE: Files are overwritten

PROCESS

CHALLENGE 3: Materials

INTENT: Allow user layer-conventions

1. Assigning materials by layer
2. Rhino's material index
 - a. Not standardized
 - b. Inability to recall reliably
3. Use color instead
4. Material names are for user identification and export

PROCESS

CHALLENGE 4: Geometry → obj2rad, .map file
INTENT: ACCURACY

1. Point ordering for geometry output
2. Material association

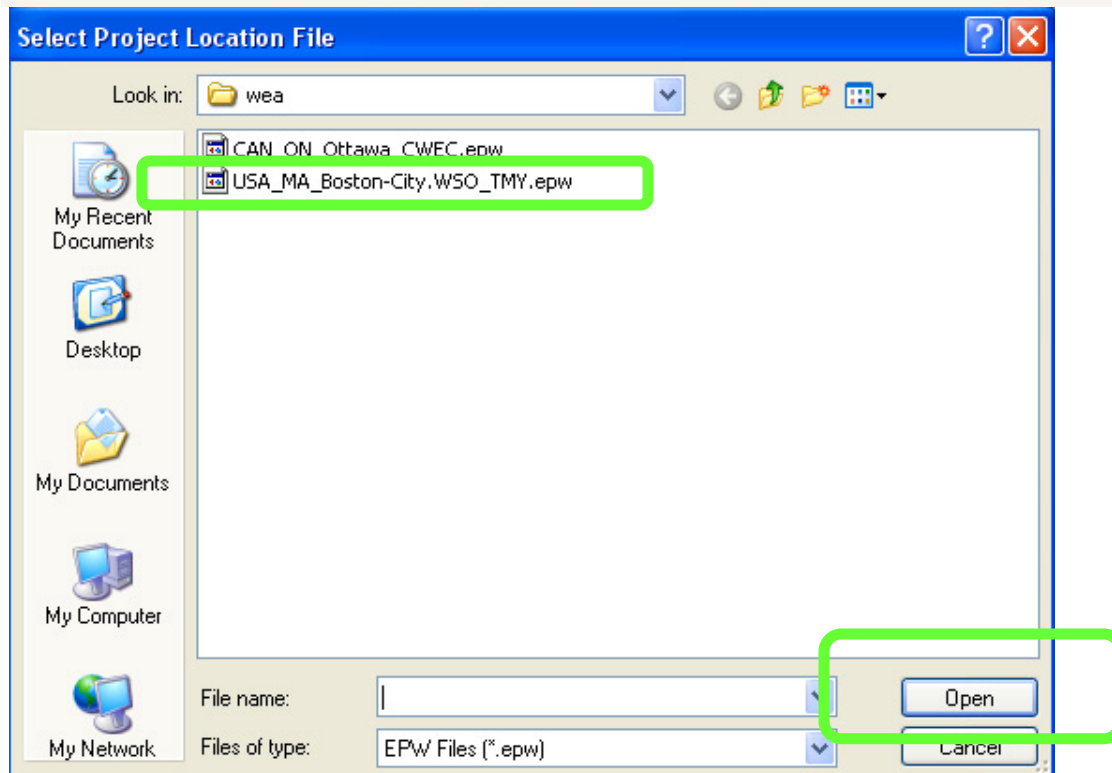

1 PROJECT INFO

FUNCTION: name, directory, location

FILES: xyzinfo.dat file, .wea file

Would you like to use a Default folder and name? <Default> ([Default](#) [UserDefined](#)):

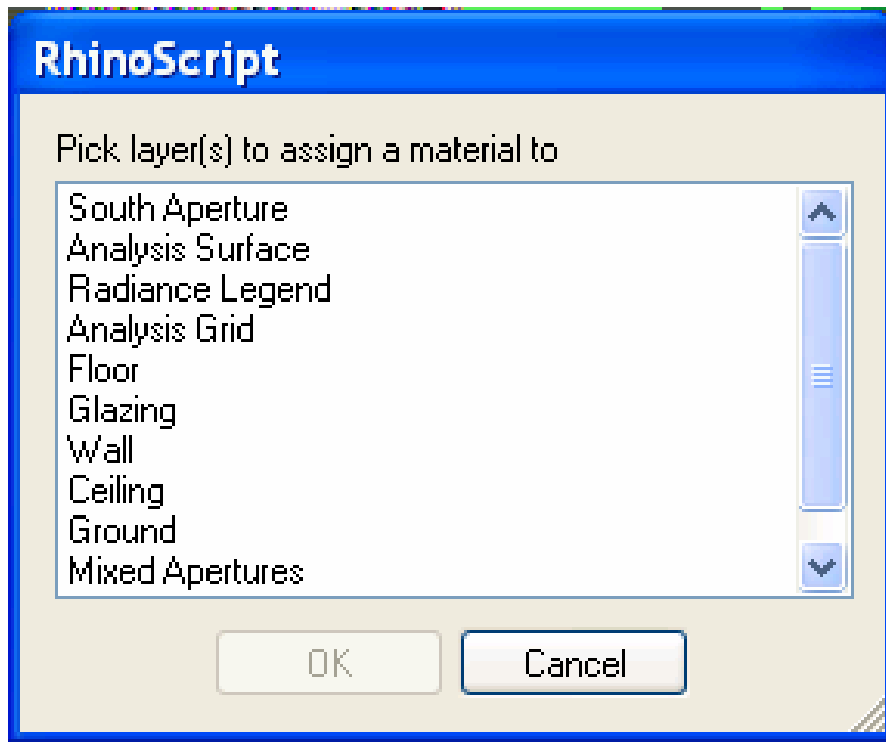

2 NODES

FUNCTION: Create point grid
FILES: xyz.pts

3 MATERIALS

FUNCTION: Assign materials to Layers
FILE: material.rad (copied)

4 PARAMETERS

FUNCTION: Sets Radiance parameters

FILE: parameters.dat

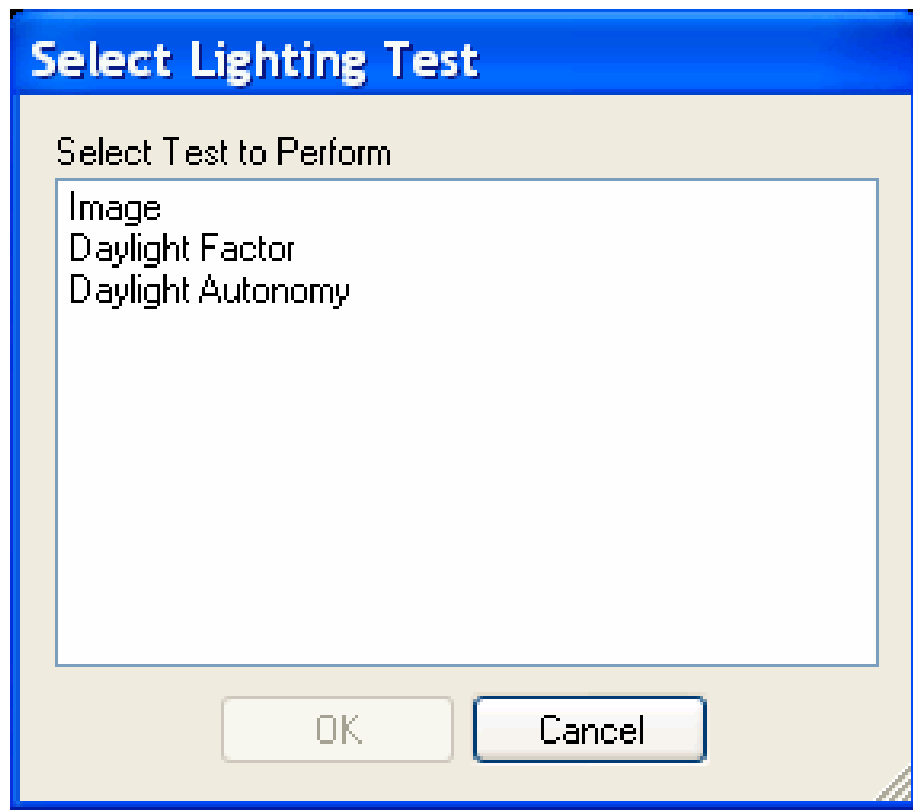

Select a parameter to change and Exit to accept defaults or finish (ab ad as ar aa Exit): ab

Enter new -ab value <5>: |

5 METRICS

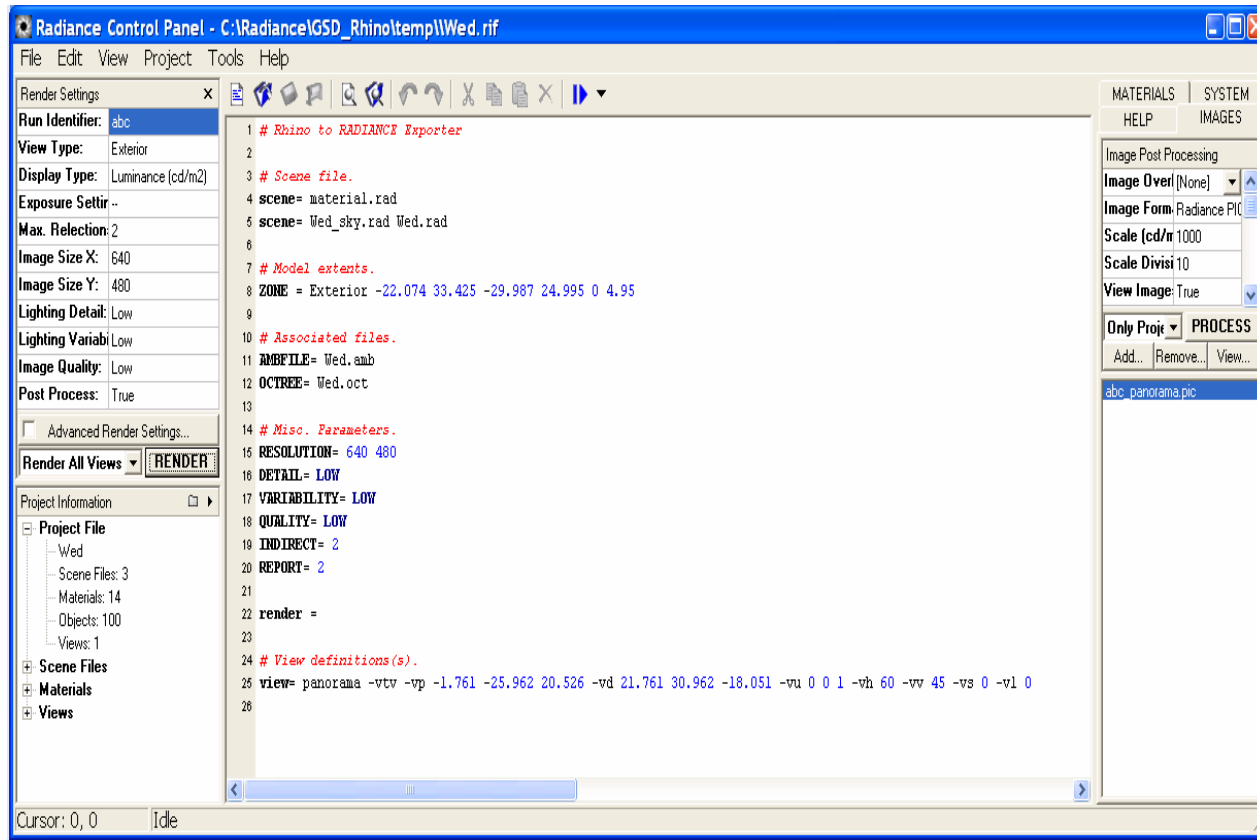

IMAGE, DF, DA
FILES: Test-dependent

5 METRICS

IMAGE

FILE: xyzimg.bat, xyz.rif...

5 METRICS

DAYLIGHT FACTOR: Performs DF
FILES: xyz.bat, xyz.dat, xyz.rad, etc.

Daylight Factor Analysis
Mean Daylight Factor = 8.98
84.9% of Area > 2% Daylight Factor

5 METRICS

DAYLIGHT AUTONOMY: Performs DA
FILES: xyz.bat, xyz.rad, xyz.da, etc.

DEMO

USING RAD CONF.3DM

WHY?

APPLICATIONS/APPLICABILITY

- 1. Design Validation**
- 2. Design Evaluation / Optimization**
- 3. Rapid Iterations at all phases of design**

FUTURE

ADDITIONAL FUNCTIONALITY

- 1. Materials Management**
- 2. Additional Metrics**
- 3. Vertical Surfaces**
- 4. Loading of saved results**
- 5. Sky Options**

ACKNOWLEDGEMENTS

The development of this document has been supported by the following organizations:

Harvard Graduate School of Design:

The GSD has been putting special attention to the advancement of environmental building performance, supporting a number of researches in the matter. www.gsd.harvard.edu

The Presidential Instructional Technology Fellows:

The Presidential Instructional Technology Fellows (PITFs) program was established to recruit and train fellows in conjunction with the Schools to work with faculty to develop digital course materials with immediate educational benefits. PITFs leverage existing software tools developed here at Harvard and provide outreach. www.provost.harvard.edu/funding
