

**NAME**

plotin - convert plot(5) to metafile(5) primitives

**SYNOPSIS**

**plotin** file ..

**DESCRIPTION**

*Plotin* reads each plot(5) *file* in sequence and converts it to output suitable for use by the metafile filters. If no input files are specified, the standard input is read.

**EXAMPLE**

To plot the graph example.grf to the imagen:

```
graph < example.grf | plotin | psmeta | lpr
```

**FILES**

see pexpand(1)
